

Program

- 1 Put soup in basket
- 2 Put tomato in basket

Image + robot state

Motion segment

Shape: $c_0, \dots, c_7$

Gripper: $g_0, \dots, g_7$

Duration: $\hat{T}$

Decode

$$p(u) = \sum_i B_i(u) c_i$$

$$h = \text{round}(\alpha \rho \hat{T})$$

Difference $\rightarrow$ robot actions

Several motion segments execute each language clause.
