

1 SEMANTIC INPUT

camera views + robot state

active put soup in basket →

next put tomato in basket

2 POLICY

SmolVLA

action expert

3 EVENT SPLINE

8 pose controls + gripper curve

predicted duration $\hat{T}$

4 EXECUTION

pace α 

sample rate ρ 

$h = \text{round}(\alpha \rho \hat{T})$

curve samples → actions

A clause selects the subgoal; several event-aligned segments execute it.
